Experience and Education Equivalency/Substitutions

Years of Experience Acceptable for Substitution for Levels of Education
A Bachelor's Degree is equivalent to a High School Diploma + 4 years of additional experience.
A Master's is equivalent to a Bachelor' Degree + 2 additional years of experience.
A Doctorate is equivalent to a Masters + 6 additional years of experience.

Descriptions

Item #	Labor Category Title	Minimum Years of Experience	Minimum Educational/ Degree Requirements	Functional Responsibilities
1001	Administrative Assistant	4	High School	One to two years of experience in office procedures, supporting document creation, filing, and other administrative duties. The Administrative Assistant supports the production of project deliverables and performs clerical and administrative functions required to complete work related to the project. Duties include general clerical, receptionist and project-based work. Projects a professional company image through in-person and phone interaction. Functional Responsibility: Provides clerical and administrative support for all personnel and tasks associated with a given contract.
1002	Administrative Specialist	3	High School	Responsible for the preparation of correspondence and technical documents in final form using IT equipment and software. Assists in the development of recordkeeping guidelines and procedures. Reviews office correspondence, staff actions and reports for clarity, completeness, and grammatical and procedural correctness. Provides assistance in establishing and maintaining both centralized and decentralized office files, and management and record keeping systems.

Item #	Labor Category Title	Minimum Years of Experience	Minimum Educational/ Degree Requirements	Functional Responsibilities
1003	Analyst Entry level	2	High School	<p>Less than 2 years of experience in providing specialized knowledge of system requirements and programming specifications. Designs solutions based on customer needs and technical considerations. Analyses job tasks, organizational structure and user requirements to provide system-wide solutions. Applies analytical expertise to assist in defining, analyzing, validating and documenting complex operating environments, states of technology and current processes. Functional Responsibility: Discovering the underlying business need to be addressed and information related to the product and project requirements, often through conversations with stakeholders. Organizing, specifying and modelling the requirements to ensure they are complete and unambiguous. Documenting the requirements in a format that can be shared with stakeholders. Ensuring the requirements map to the real business need, are approved by all relevant stakeholders, and meet essential quality standards.</p>
1004	Analyst I	2	Bachelors	<p>Minimum 2 years of experience in providing specialized knowledge of system requirements and programming specifications. Designs solutions based on customer needs and technical considerations. Analyses job tasks, organizational structure and user requirements to provide system-wide solutions. Applies analytical expertise to assist in defining, analyzing, validating and documenting complex operating environments, states of technology and current processes. Functional Responsibility: Discovering the underlying business need to be addressed and information related to the product and project requirements, often through conversations with stakeholders. Organizing, specifying and modelling the requirements to ensure they are complete and unambiguous. Documenting the requirements in a format that can be shared with stakeholders. Ensuring the requirements map to the real business need, are approved by all relevant stakeholders, and meet essential quality standards.</p>

Item #	Labor Category Title	Minimum Years of Experience	Minimum Educational/ Degree Requirements	Functional Responsibilities
1005	Analyst II	4	Bachelors	<p>Minimum 4 years of experience in providing specialized knowledge of system requirements and programming specifications. Designs solutions based on customer needs and technical considerations. Analyses job tasks, organizational structure and user requirements to provide system-wide solutions. Applies analytical expertise to assist in defining, analyzing, validating and documenting complex operating environments, states of technology and current processes. Functional Responsibility: Discovering the underlying business need to be addressed and information related to the product and project requirements, often through conversations with stakeholders. Organizing, specifying and modelling the requirements to ensure they are complete and unambiguous. Documenting the requirements in a format that can be shared with stakeholders. Ensuring the requirements map to the real business need, are approved by all relevant stakeholders, and meet essential quality standards.</p>
1006	Analyst III	8	Bachelors	<p>Minimum 8 years of experience in providing specialized knowledge of system requirements and programming specifications. Designs solutions based on customer needs and technical considerations. Analyses job tasks, organizational structure and user requirements to provide system-wide solutions. Applies analytical expertise to assist in defining, analyzing, validating and documenting complex operating environments, states of technology and current processes. Functional Responsibility: Discovering the underlying business need to be addressed and information related to the product and project requirements, often through conversations with stakeholders. 				<p>stakeholders. Organizing, specifying and modelling the requirements to ensure they are complete and unambiguous. Documenting the requirements in a format that can be shared with stakeholders. Ensuring the requirements map to the real business need, are approved by all relevant stakeholders, and meet essential quality standards.</p>
1009	APP Developer 1	2	Bachelors	<p>Works under general direction. Formulates/defines system scope and objectives. Devises or modifies procedures to solve moderately complex problems considering computer equipment capacity and limitations. Codes, tests, debugs, and documents computer programs. May be familiar with Internet technologies. Working knowledge of at least one development language. May be involved in related areas such as database design/management and evaluation of commercial off-the-shelf (COTS) products.</p>
1010	APP Developer 2	4	Bachelors	<p>Formulates/defines system scope and objectives. Devises or modifies procedures to solve complex problems considering computer equipment capacity and limitations. Prepares detailed specifications from which programs will be written. Designs, codes, tests, debugs, and documents programs. May be familiar with Internet technologies. Working knowledge of at least two development languages. May be involved in related areas such as database design/management, evaluation of commercial off-the-shelf (COTS) products, and analysis of network hardware/software issues. May provide guidance to other systems analysts and programmers.</p>

Item #	Labor Category Title	Minimum Years of Experience	Minimum Educational/ Degree Requirements	Functional Responsibilities
1011	Applications Developer, Level 2	3	Masters	<p>Minimum General Experience: 3 years of general experience in applications development is required. 2 years of specialized experience with Microsoft .NET programming (e.g., C sharp (C#), Visual Basic (VB). Microsoft .NET; Python; and/or SQL Server is preferred. Experience with Ansible/Puppet and Docker Container is also preferred. Experience demonstrating leadership skill and qualities is required.</p> <p>Functional Responsibility: May work with minimal supervision/guidance. Develops and/or modifies computer programs, provides systems analysis, designs technical solutions, codes solutions, conducts system testing, implements the solution, and provides maintenance and support for software applications. Major duties and responsibilities include, but are not limited to performing technical systems analysis tasks; testing and debugging programs; coding and modifying programs; participating in systems testing; performing user requirements systems analysis tasks; reviewing, discussing, and comprehending assignments with project leader(s); documenting programs; and attending project meetings. May assume a technical lead role on small- to mid-size development projects. Interacts with customers regarding strategies, requirements, problem solving, and support.</p> <p>Minimum Education/Training: A Bachelor's Degree in Computer Science, Information Systems, Engineering, Mathematics, Business, or another related discipline is required. Additional experience is accepted in lieu of a Bachelor's Degree. A Master's Degree accounts for 2 additional years of experience. Specialized IT training and/or certifications related to software development/programming (e.g., Oracle, Java, .NET, Python) are required.</p>

Item #	Labor Category Title	Minimum Years of Experience	Minimum Educational/ Degree Requirements	Functional Responsibilities
1012	Applications Developer, Level 3	4	Bachelors	<p>Minimum General Experience: 4 years of general experience in developing applications and performing computer programming and systems analysis of applications is required. 4 years of specialized experience with industry accepted computing applications such as Microsoft Office, Lotus Smartsuite, and/or Corel Office Suites is desired. 3 years of specialized experience with HTML Editors; 2 years of specialized experience with Web Site Development Tools; and 2 years of specialized experience in Graphics Creation/Manipulation of tools are preferred. Experience demonstrating leadership skills and qualities are required.</p> <p>Functional Responsibility: May work with minimal supervision/guidance. Provides a variety of applications development services to include, but not limited to, creative editing of HTML or word processing documents; creation of documentation and utilization of FTP (File Transfer Protocol) to host web content; designing web pages including layout and graphical content; setting up websites which remain compliant with cross browser platforms; assisting in the research and development of web site functional requirements, specifications, logical and physical design; researching new applications and technologies; and performing analysis of existing or prospective IT systems, applications; security tools and methods. Assumes responsibility for general design or redesign of computer systems or subsystems; development of prototype systems to test and demonstrate feasible system concepts, alternative approaches, etc.;</p> <p>Participates in the development of software user manuals; and instructs, assigns, directs, and checks the work of other software developers on development team. May assume a technical lead role on development projects. May interact with customers regarding strategies, requirements, problem solving, and support.</p> <p>Minimum Education/Training: A Bachelor's Degree in Computer Science, Information Systems, Engineering, Mathematics, Business, or another</p>

Item #	Labor Category Title	Minimum Years of Experience	Minimum Educational/ Degree Requirements	Functional Responsibilities
				<p>related discipline is required. Additional experience is accepted in lieu of a Bachelor's Degree. A Master's Degree accounts for 2 additional years of experience. Specialized IT training and/or certifications related to software development/programming (e.g., Microsoft Certified Professional Developer (MCPD) for ASP .NET, Oracle Java Certified Developer) are required.</p>
1013	Applications Engineer, Level 2	5	Bachelors	<p>Minimum General Experience: 5 years of general experience providing purpose built applications services and support is required. 2 years of specialized experience related to .NET programming (e.g., C#, VB.NET, ASP, NET and ADO, NET); and Python, SQL Server Ansible/Puppet and Docker Container is desired. Experience with software engineering using object-oriented methodologies is desired. Experience demonstrating leadership skills and qualities are required.</p> <p>Functional Responsibility: May work with minimal supervision/guidance using Java, Java Enterprise Edition (JEE) architecture, and Service Oriented Architecture (SOA)/ Enterprise Bus (ESB), and/or software technologies. May work as a software developer and/or an integrator as part of a development team throughout the applications design, development, and maintenance life cycle. Performs duties to include, but not limited to overseeing technical design, development, and implementation of small- to mid-size projects and/or major software products and systems; assisting in defining architecture requirements and establishing standards for design and development; consulting with management and customers regarding product feasibility and viability of product plans and designs; and factoring emerging technologies and product supportability into design and implementation. May provide product demonstrations and participate in trade shows, seminars, industry panels, and user group meetings. Works with technical leads, other developers, system engineers, and test engineers to participate in peer reviews and to ensure successful integration with other software components. Provides tradeoffs between reuse options, Operations</p>

Item #	Labor Category Title	Minimum Years of Experience	Minimum Educational/ Degree Requirements	Functional Responsibilities
				<p>& Management (O&M) implications, and cost/schedule/performance issues. Supports subsystem risk/opportunity identification. May interact with customers regarding strategies, requirements, problem solving, and support. Minimum Education/Training: A Bachelor's Degree in Computer Science, Information Systems, Engineering, Mathematics, Business, or another related discipline is required. Additional experience is accepted in lieu of a Bachelor's Degree. A Master's Degree accounts 2 additional years of experience. Specialized IT training and/or certifications related to the applications engineering (e.g. AWS Certified Developer, Associate or Microsoft Certified Solutions Developer (MCSD)) are required.</p>
1014	Architect Engineer, Level 3	8	Bachelors	<p>Minimum General Experience: 8 years of general experience in the areas of Information Technology (IT) design, communication network planning, datacenter optimization, and cloud systems design is required. 6 years of specialized experience in the management of mid to large-scale system architecture is required. 2 years of experience related to network management, engineering, and administration is required. Experience demonstrating leadership skills and qualities are required. Functional Responsibility: May provide supervision and technical guidance to project teams. Designs and develops new hardware and/or software products and/or makes major enhancements to existing hardware and/or software. Addresses issues related to systems integration, compatibility, and multiple platforms. Performs feasibility analysis on potential and/or IT future projects. Responsible for performing projects in accordance with client expectations, contract requirements, and technical specifications. Assumes a performance management and technical lead role on engineering projects. Interacts with customers regarding strategies, requirements, problem solving, and support. Minimum Education/Training: A Bachelor's Degree in Computer Science, Information Systems, Engineering, Mathematics, Business, or another</p>

Item #	Labor Category Title	Minimum Years of Experience	Minimum Educational/ Degree Requirements	Functional Responsibilities
				related discipline is required. Master's Degree in a related discipline is preferred. Additional experience is accepted in lieu of a Bachelor's Degree. A Master's Degree accounts for 2 additional years of experience. Specialized technical training and/or certifications related to engineering (e.g., Amazon Web Services (AWS) Solutions Architect, Associate or Cisco Certified Network Associate (CCNA) Data Center)
1015	Associate Compliance Consultant	7	Bachelors	Supports the implementation and further development of compliance efforts related primarily to reliability. Maintains knowledge and assists in interpretation of standards and guidelines
1016	Associate Compliance Engineer	2	Bachelors	Assists with designing and writing the compliance system. Documents, organizes, and maintains working papers for the compliance system.
1017	Business Analyst	9	Bachelors	Involved in entire Software Development Life Cycle (primarily in the Initiation, Scoping, Planning, Requirements Analysis, Functional Design, Testing, Training and Implementation phases). Elicit, analyze, validate and document user, functional and nonfunctional requirements, business rules, and business process models. Perform gap analysis by documenting current and future state processes of the recruiting models. Assist team members with data profiling and mapping. Facilitate and monitor the development of Quality Control (QC) and User Acceptance (UA) test plans, test cases and related activities, validating and certifying that the delivered solution meets the needs of the business as documented in the user requirements. Develop reasonable time estimates for project team tasks, and complete assigned tasks in a timely manner with a high level of quality. Assist the Project Manager in the performance of the PM's duties and act on behalf of the Project Manager during the PM's absence.
1018	Cloud Administrator 1	6	Bachelors	Supports Cloud Architect in meeting with customer to determine project requirements. Provides full-range of cloud administration, configuration, and maintenance support. Keeps the customer informed of project status on a regular basis.

Item #	Labor Category Title	Minimum Years of Experience	Minimum Educational/ Degree Requirements	Functional Responsibilities
1019	Cloud Administrator 2	8	Bachelors	Supports Cloud Architect in meeting with customer to determine project requirements. Provides full-range of cloud administration, configuration, and maintenance support. Keeps the customer informed of project status on a regular basis. Creates and maintains cloud accounts. Modifies existing cloud accounts.
1020	Cloud Administrator 3	9	Bachelors	Works in conjunction with Cloud Architect in meeting with customer to determine requirements. Provides full-range of cloud administration, configuration, and maintenance management. Oversees the creation and/or maintenance of cloud accounts. Modifies existing cloud accounts based on the evolution of the customer requirements
1021	Cloud Architect 1	6	Bachelors	Assists in the cloud requirements analysis, conceptual design, detailed design, and implementation of cloud projects. Assists in the migration of a cloud effort. Generates cloud documentation.
1022	Cloud Architect 2	8	Bachelors	Assists in the cloud requirements analysis, conceptual design, detailed design, and implementation of cloud projects. Assists in the migration of a cloud effort. Generates cloud documentation. Generates customer design review materials to present at customer design reviews.
1023	Cloud Architect 3	10	Bachelors	Oversees the cloud requirements analysis, conceptual design, detailed design, and implementation of a cloud project. Oversees the migration of a cloud effort. Generates/approves requisite cloud documentation. Generates customer design review materials and presents at customer design reviews.
1024	Cloud Architect 4	12	Bachelors	Oversees the cloud requirements analysis, conceptual design, detailed design, and implementation of a cloud project. Oversees the migration of a cloud effort. Generates/approves requisite cloud documentation. Generates customer design review materials and presents at customer design reviews.

Item #	Labor Category Title	Minimum Years of Experience	Minimum Educational/ Degree Requirements	Functional Responsibilities
1025	Cloud Engineer, Level 2	5	Bachelors	<p>Minimum General Experience: 5 years of general experience related to implementing and maintaining cloud management solutions including initial and ongoing configuration of related automation, notifications, and reporting capabilities is required. Experience solving system problems related to cloud computing is required. 2 years of specialized experience working with a variety of legacy applications and platforms and working with application teams to implement or migrate associated components to cloud services; identifying and troubleshooting cloud service events and issues; working with cloud service providers to efficiently solve issues or implement workarounds; and/or planning and leading an engagement with an application team adopting DevOps and Cloud solutions is required. Additionally, experience with, and an understanding of, software engineering practices and the impact they have on efficient and effective use of DevOps and Cloud solutions is preferred.</p> <p>Functional Responsibility: May work with minimal supervision/guidance. Provides implementation and configuration expertise associated the use of cloud services. Provides direct analysis and recommendations associated with the implementation or migration of specific applications to cloud services. Works with engineering, service, and business teams to create cloud technology roadmaps. Specific responsibilities may include, but are not limited to developing standards in partnership with engineering, infrastructure services, and application development; developing and executing strategies to increase Cloud Security knowledge throughout the enterprise,; developing and refining global information security technical standards and guidelines; supporting engineering requirements of Legacy/On-Prem enterprise applications and developing Cloud migration solutions; and troubleshooting and problem solving to remediate issues prohibiting migration or uncovered by migration.</p> <p>Minimum Education/Training: A Bachelor's Degree</p>

Item #	Labor Category Title	Minimum Years of Experience	Minimum Educational/ Degree Requirements	Functional Responsibilities
				<p>in Computer Science, Information Systems, Engineering, Mathematics, Business, or another related discipline is required. Additional experience is accepted in lieu of a Degree. A Master's Degree accounts for 2 additional years of experience. Specialized technical training and/or certifications related to the cloud computing (e.g., Amazon Web Services (AWS) Solutions Architect, Associate or Architecting Microsoft Azure Solutions Exam 70-535) are preferred.</p>
1026	Cloud Security Specialist 2	10	Bachelors	<p>Has strong understanding of Cloud information flows and process architecture necessary for implementation of cloud security. Uses information technology to plan, prepare, and execute cloud related security tasks. Prepares and reviews Cloud security architecture. Applies knowledge of security requirements, documentation, and risk mitigation strategies. Develops Cloud design documentation. Implements Cloud security policies and procedures. Conducts Cloud security audits against contractual requirements.</p>
1027	Cloud/Web Architect	6	Bachelors	<p>Responsible for designing and implementing enterprise infrastructure and platforms required for cloud computing. Analyzes system requirements and ensures that systems will be securely integrated with current applications. Has a deep understanding of system development in cloud environments, including Software as Service (SaaS), Platform as Service (PaaS), or Infrastructure as a Service (IaaS).</p>
1028	Cloud/Web Developer	5	Bachelors	<p>Responsible for developing, testing, implementing, and maintaining web-based application systems. Troubleshoots system problems and issues and looks for ways to improve the application. Has knowledge of commonly-used concepts, practices, and procedures within a particular field (i.e., HTML, Java, etc.). Develops applications and components that leverage the underlying cloud capabilities through APIs calls. Familiar with a variety of the field's concepts, practices, and procedures.</p>

Item #	Labor Category Title	Minimum Years of Experience	Minimum Educational/ Degree Requirements	Functional Responsibilities
1029	Computer Systems Analyst I	1	Bachelors	Analyzes information requirements. Evaluates analytically and systematically problems of workflow, organization, planning, and development of appropriate corrective actions. Helps develop plans for automated information systems from project inception to conclusion. Defines the problem, and develops system requirements and program specifications from which programmers prepare detailed flow charts, programs, and tests. Complies with prescribed customer, industry and agency standards.
1030	Computer Systems Analyst II	3	Bachelors	Analyzes and develops computer software possessing a wide range of capabilities, including numerous engineering, business, and records management functions. Develops plans for automated information systems from project inception to conclusion. Analyzes user interfaces, downtimes workload and computer usage, and proposed systems modifications, upgrades and new off-the-shelf systems. Performs tuning of hardware, software, and interfaces with outside systems. Analyzes problems and information to be processed. Defines problems and develops system requirements and program specifications. Complies with prescribed customer, industry and agency standards.
1031	Computer Systems Analyst III	6	Bachelors	Provides technical direction and leadership for personnel performing software development tasks, including the review of work products for correctness, adherence to the design concept and to user standards, and for progress in accordance with schedules. Coordinates with the project lead to ensure problem solution and user satisfaction. Makes recommendations for approval of major system installations. Prepares milestone status reports, deliveries, and presentations on the system concept to others. Complies with prescribed customer, industry and agency standards.

Item #	Labor Category Title	Minimum Years of Experience	Minimum Educational/ Degree Requirements	Functional Responsibilities
1032	Configuration Management (CM) Specialist - Mid-Level	0	Bachelors	<p>Conducts CM Plan Reviews and escalates issues as necessary. Conducts periodic oversight meetings with projects to ensure compliance with CM policies and procedures. Conducts CM Audits and escalates issues as necessary. Provides CM mentoring and support to projects by assisting in configuration of CM tools, and communicating industry best practices and innovations related to CM. Applies Software Development Life Cycle and product development processes and knowledge of process improvement models such as CMMI, SW-CMM, or Six Sigma. Uses CM concepts, processes, and standards for configuration planning, configuration identification, configuration control, configuration status accounting, configuration auditing, and CM tools. Measures and reports CM activities. Ensures subcontractor compliance by monitoring and reporting subcontractor CM activities, and escalating issues as necessary. Continuously improves CM processes by suggesting and implementing associated improvement proposals. Capable of documenting, analyzing, evaluating, and tracking status of change requests. Capable of coordinating and conducting configuration control board meetings.</p>
033	Cost Modeling Specialist, Level 3	10	Bachelors	<p>Minimum General Experience: 10 years of general experience in the areas of Information Technology (IT) and/or the acquisition of major systems for large organizations is required. 4 years of specialized experience in acquisition management; cost estimating and analysis; financial management (e.g., program planning and budgeting, leading analysis teams, program and project management); systems engineering; and directing, supervising and leading large projects is required. Experience demonstrating leadership skills and qualities are required.</p> <p>Functional Responsibility: May provide supervision and technical guidance to project teams. Analyzes existing program processes, procedures, staffing, and support infrastructure to develop models of project/program costs. Addresses issues related to using integrated systems and complex usage patterns. Performs feasibility analysis regarding the</p>

Item #	Labor Category Title	Minimum Years of Experience	Minimum Educational/ Degree Requirements	Functional Responsibilities
				<p>probability of success on chargeback algorithms within the corporate culture being evaluated. May assume the lead performance management and/or technical lead role on projects. Interacts with customers regarding cost/acquisition strategies, requirements, problem solving, and support.</p> <p>Minimum Education/Training: A Bachelor's Degree in Business Administration, Accounting or another related discipline is required. A Master of Business Administration is preferred. Additional experience is accepted in lieu of a Bachelor's Degree. A Master's Degree accounts for 2 additional years of experience. Specialized training and/or certifications related to cost modeling/acquisitions is (e.g., Financial Modeling Certification, Cloud Business Associate Certification) are required.</p>

Item #	Labor Category Title	Minimum Years of Experience	Minimum Educational/ Degree Requirements	Functional Responsibilities
1034	Disaster Recovery Engineer, Level 2	3	Bachelors	<p>Minimum General Experience: 3 years of general Information Technology (IT) experience related to disaster recovery processes, procedures, design, and implementation; and working in an enterprise environment protecting data and ensuring business continuity is required. 3 years of specialized experience with enterprise disaster recovery is required. Familiarity with various enterprise data replication and disaster recovery solutions is required. Familiarity with data backup and recovery software such as Veritas NetBackup, Commvault or EMC Data Protection Solutions is preferred. Familiarity with engineering solutions based on a desired recovery time objective (RTO) and recovery point objective (RPO) is preferred. Integrated disaster recovery solutions experience leveraging technologies such as VMWare Site Recovery Manager (SRM) is preferred. Specialized experience with cloud storage and disaster recovery solutions utilizing public cloud solutions providers such as Amazon Web Services, Microsoft Azure, and others is preferred.</p> <p>Functional Responsibility: May work with minimal supervision/guidance. Engineers the design, implementation, and communication of business continuance and disaster recovery plans and processes that ensure the security and integrity of customer data, databases, information systems, and technology. Conducts risk analysis to identify critical operations and systems that are core to continued business operations in the event of a disruption. Designs and administers programs to include policies, standards, guidelines, training programs, and a viable quality assurance process for disaster recovery. Oversees and reviews the testing and implementation of software, data systems, and data networks to ensure that the integrity and security of all electronic data and data systems are adequately protected. Facilitates the preparation of an organization-wide business continuity plan. Assists in the coordination and establishment of disaster recovery programs and business continuity planning across mainframe and client server platforms.</p>

Item #	Labor Category Title	Minimum Years of Experience	Minimum Educational/ Degree Requirements	Functional Responsibilities
				<p>Coordinates and monitors simulation testing across all platforms. Designs and administers programs to include policies, standards, guidelines, training programs, and a viable quality assurance process for disaster recovery. Assists customer in managing the contracts with required vendors for off-site and other resources required for business continuation and recovery</p> <p>Minimum Education/Training: A Bachelor's Degree in Computer Science, Information Systems, Engineering, Mathematics, Business, or another related discipline is required. Additional experience is accepted in lieu of a Bachelor's Degree. A Master's Degree accounts for 2 additional years of experience. Specialized technical training and/or enterprise level vendor data backup and recovery certifications (e.g., eritas Certified Specialist, NetBackup) are preferred.</p>
1036	Financial Analyst	3	Bachelors	<p>Develops rate structures, devises and implements record systems, and performs analysis of financial activity. Ensure successful assessment and documentation of client's business processes and information needs, including opportunities for improvement. Interacts extensively with external or internal clients and documents the results of interviews with client personnel and other stakeholders of the project. Works closely with clients to identify business needs, recommend areas for improvement, and determine the costs and benefits of implementing recommended business process improvements and/or solutions. Integrates business, cost estimating and financial management processes to ensure efficient stewardship of public funds. Generates strategic financial plans, cost estimates and correlation of financial requirements into executable budgets. Assesses products or procedures for applicable government standards, accounting principles, and internal controls. Produces project feasibility reports and identifies options for potential solutions and assessing them for both technical and business suitability. Collaborates with resources to ensure all proposed system design requirements adequately reflect the defined business</p>

Item #	Labor Category Title	Minimum Years of Experience	Minimum Educational/ Degree Requirements	Functional Responsibilities
				processes and fully support all components of the functional business requirements. Interfaces with client program and management personnel and is adept in oral and written communications.
1037	Help Desk Engineer, Level 2	2	Bachelors	<p>Minimum General Experience: 2 years of general experience supporting Information Technology (IT) systems, applications, and/or processes is required. 1 year of specialized experience providing technical and user support is required. Experience involving a Cloud based application infrastructure is preferred. Demonstrated ability to understand problems, and effectively identify and communicate solutions is required.</p> <p>Functional Responsibility: May work with minimal supervision/guidance. Serves as the first point of contact for customers seeking technical assistance over the phone or email. Performs remote troubleshooting through diagnostic techniques and pertinent questions. May provides second-tier support to cloud application and developer end users for either Google, Azure or Amazon Cloud services environments. Determines the best solution based on the issue and details provided by customers. Interacts with network services, software systems engineering, and/or applications development to restore service and/or identify and correct core problem. Walk the customer through the problem-solving process. Directs unresolved issues to the next level of support personnel. Provide accurate information on IT products or services. Records events and problems and their resolution in logs. Follows up and updates customer status and information. Simulates or recreates user problems to resolve operating difficulties. Recommends systems modifications to reduce user problems. Passes on any feedback or suggestions by customers to the appropriate internal team. Identifies and suggests possible improvements on procedures.</p> <p>Minimum Education/Training: A High School Diploma is required. A Bachelor's Degree in Computer Science, Information Systems, Engineering, Mathematics, Business, or another related discipline is preferred. A Bachelor's Degree</p>

Item #	Labor Category Title	Minimum Years of Experience	Minimum Educational/ Degree Requirements	Functional Responsibilities
				accounts for 4 additional years of experience.
1038	Help Desk Specialist I	0	High School	Provides support to end users on a variety of issues. Identifies, researches, and resolves technical problems. Responds to telephone calls, email and personnel requests for technical support. Documents, tracks and monitors the problem to ensure a timely resolution. Has knowledge of commonly-used concepts, practices, and procedures within a particular field. Relies on instructions and pre-established guidelines to perform the functions of the job. Works under immediate supervision. Primary job functions do not require exercising independent judgment. Reports to a supervisor. Tier 1 basic help desk resolution and service desk delivery
1039	Help Desk Specialist II	2	High School	Provides support to end users on a variety of issues. Identifies, researches, and resolves technical problems. Responds to telephone calls, email and personnel requests for technical support. Documents, tracks and monitors the problem to ensure a timely resolution. Familiar with standard concepts, practices, and procedures within a particular field. Relies on limited experience and judgment to plan and accomplish goals. Works under general supervision.
1040	Help Desk Specialist III	4	Bachelors	Provides support to end users on a variety of issues. Identifies, researches, and resolves technical problems. Responds to telephone calls, email and personnel requests for technical support. Documents, tracks and monitors the problem to ensure a timely resolution. Familiar with standard concepts, practices, and procedures within a particular field. Relies on limited experience and judgment to plan and accomplish goals. Works under general supervision. Tier 2 in depth technical support.
1041	Help Desk Specialist IV	6	Bachelors	Helps supervise the day-to-day operations of the help desk. Identifies, researches, and resolves complex technical problems. Creates and manages escalation procedures and ensures service levels are maintained. Documents, tracks, and monitors problems to ensure resolution in a timely manner. A level I supervisor is considered a working supervisor with little authority for personnel actions. Familiar

Item #	Labor Category Title	Minimum Years of Experience	Minimum Educational/ Degree Requirements	Functional Responsibilities
				with a variety of the field's concepts, practices, and procedures. Relies on experience and judgment to plan and accomplish goals. Performs a variety of complicated tasks. May lead and direct the work of others. Reports to a project leader or manager. A wide degree of creativity and latitude is expected. Tier 3 export produce and service support.
1042	Help Desk Specialist V	8	Bachelors	Supervises the day-to-day operations of the help desk. Identifies, researches, and resolves complex technical problems. Creates and manages escalation procedures and ensures service levels are maintained. Documents, tracks, and monitors problems to ensure resolution in a timely manner. A level II supervisor has authority for personnel actions and oversees most day-t- day operations of group. Familiar with a variety of the field's concepts, practices, and procedures. Relies on extensive experience and judgment to plan and accomplish goals. Performs a variety of tasks. A wide degree of creativity and latitude is expected. Reports to a manager or head of a unit/department.
1043	High Performance Computing Engineer, Level 2	5	Bachelors	<p>Minimum General Experience: 5 years of general Information Technology (IT) experience related to high performance computing, software engineering, systems and network programming, Linux operating systems, grid schedulers and process automation is required. 4 years of specialized experience with Python, C/C++, Bash, and JavaScript; HTML, CSS, Ansible, and Expect; JSON, HTTP, XML, CSV, and REST API Git; gcc/g++, gdb, pdb, and strace; GitHub, IPMI, RedFish, Lustre, SCSI, SNMP, PostgreSQL, and Django is preferred.</p> <p>Functional Responsibility: May work with minimal supervision/guidance. Designs, develops, troubleshoots, and debugs software programs for software development and enhancements. Determines hardware compatibility and/or influences hardware design. Designs enhancements, updates, and programming changes for portions and subsystems of systems software, including operating systems, compilers, networking, utilities, databases, Internet-related tools, etc. Implements software for large scale systems; executes and writes portions of</p>

Item #	Labor Category Title	Minimum Years of Experience	Minimum Educational/ Degree Requirements	Functional Responsibilities
				<p>testing plans, protocols, and documentation for assigned portion of application; and identifies and debugs issues with code and suggests changes or improvements for high performance computing. May participate as a member of a project team of other software systems engineers, and internal and outsourced development partners to develop reliable, cost effective and high-quality solutions for assigned systems portion or subsystem. Primary responsibility will be building cluster computing systems with various Linux operating systems.</p> <p>Minimum Education/Training: A Bachelor's Degree in Computer Science, Information Systems, Engineering, Mathematics, Business, or another related discipline is required. Additional experience is accepted in lieu of a Degree. A Master's Degree accounts for additional experience. Specialized technical training and/or certifications related to high performance computing (e.g., Redhat Certified System Administrator (RHCSA)) are required.</p>
1044	Network Engineer, Level 2	5	Bachelors	<p>Minimum General Experience: 5 years of general experience planning, designing, and analyzing telecommunications networks is required. Specialized experience may include, but not be limited to Ethernet and Infiniband networking; operating systems and protocols such as TCP/IP and Mellanox Infiniband; and/or Intel Omnipath. Specialized experience with network analysis/management tools and techniques and familiarity with a data center network environment is required. Experience and familiarity with Information Technology (IT) and long distance and local carrier telecommunications management is preferred.</p> <p>Functional Responsibility: May work with minimal supervision/guidance. Responsible for the design and implementation of LAN/WANs using hub and router technology. Performs hardware/software analyses to provide comparative data of performance characteristics and suitability within the existing systems environment. Prepares trade-off studies and evaluations for vendor equipment. Generates network monitoring/performance reports for</p>

Item #	Labor Category Title	Minimum Years of Experience	Minimum Educational/ Degree Requirements	Functional Responsibilities
				<p>LAN/WAN utilization studies. Recommends network design changes/enhancements for improved system availability and performance. Performs a variety of network management functions related to the operation, performance, or availability of data communications networks. May be responsible for daily operation of computer networking equipment, monitoring and tuning equipment, and establishing user accounts. May manage network e-mail functions, troubleshooting network/user problems, and implementation of solutions. May assist in the development and management of project plans. Coordinates with project manager and members of the project team and client representatives to ensure accurate solutions and user satisfaction on technical matters.</p> <p>Minimum Education/Training: A Bachelor's Degree in Computer Science, Information Systems, Engineering, Mathematics, Business, or another related discipline is required. Additional experience is accepted in lieu of a Degree. A Master's Degree accounts for 2 additional years of experience. Specialized training and/or certifications related to networking (e.g., Cisco Certified Network Professional (CCNP)) are preferred.</p>
1045	Network Engineer, Level 3	7	Bachelors	<p>Minimum General Experience: 7 years of general Information Technology (IT) experience related to network, connectivity, and integration services is required. Experience overseeing and troubleshooting complex Local Area Networking (LAN) issues and resolving Wide Area Networking (WAN) problems is required. 2 years of specialized experience implementing, integrating, and supporting of cost-effective, high-performance and LAN/WAN solutions is required. Specialized experience includes Tier 3 support and issue resolution, network design and traffic engineering, engineering support, and related subject matter. Specialized experience with Cisco routing platforms, such as Aggregation Services Routers (ASRs) is preferred. Demonstrated knowledge of routing protocols and technologies including BGP, EIGRP, DMVPN, and GRE is preferred. Experience and/or knowledge of Layer 2</p>

Item #	Labor Category Title	Minimum Years of Experience	Minimum Educational/ Degree Requirements	Functional Responsibilities
				<p>technologies including STP, MST, and VLANs are also preferred. Experience working with mid - large enterprise environments is required.</p> <p>Functional Responsibility: May work with minimal supervision/guidance. Conducts network planning, design, and initial implementation of new network project initiatives. Responsibilities include, but are not limited to providing Tier 3 technical support for diagnosing/resolving network related issues that occur during the implementation of those networks; working with the network engineering team to validate network design as per customer specifications including circuit protection, transport network selection, and interworking across networks; and providing engineering/deployment support during the implementation and turn up of new network nodes and related connections.</p> <p>Minimum Education/Training: A Bachelor's Degree in Computer Science, Information Systems, Engineering, Mathematics, Business, or another related discipline is required. Additional experience is accepted in lieu of a Degree. A Master's Degree accounts for 2 additional years of experience.</p> <p>Specialized IT training and/or certifications related to networking (e.g., Cisco Certified Network Professional (CCNP), Juniper Networks Certified Enterprise Routing and Switching Expert (JNCIE-ENT)) are required.</p>
1046	Network Installation Technician	5	High School	<p>Conducts site surveys. Assesses and documents current site network configuration and user requirements. Designs and optimizes network topologies. Follows engineering plans and site installation Technical Design Packages. Develops installation schedules. Works with network installation team. Assists in the preparation of drawing and documenting configuration changes at each site. Prepares site installation and test reports.</p>

Item #	Labor Category Title	Minimum Years of Experience	Minimum Educational/ Degree Requirements	Functional Responsibilities
1047	Network Manager	4	Bachelors	Responsible for managerial and technical administration of a LAN/WAN, including security, communications, software applications, e-mail, print services, outside communication links, UPS service, calendaring/scheduling services, license administration, file services, NOS service, backup services, and any other initial troubleshooting. Performs all phases of LAN/WAN projects to provide maintenance and upgrading of networks and their related components. Analyzes vendor products for recommendation of those that best meet user needs. Installs network software. Maintains LAN/WAN management records and assists users. Performs routine diagnostic testing and optimization of all elements of the network facilities, including power, software, communications machinery, lines, modems, and terminals. Repairs and/or replaces network hardware components. Performs component server and workstation connection, configuration, integration, and testing. Performs preventive maintenance for hardware and software, such as equipment cleaning and vacuuming, cable/connection inspection, software virus protection, and configuration integrity. Monitors and controls the performance, security, and status of network resources. Identifies and diagnoses problems and factors affecting network performance. Other duties may include the design and installation of cabling changes; maintenance of system files; operation of FIP and data communications equipment; and upgrading of system components. Ensures efforts comply with prescribed industry, customer and agency standards.
1048	Network Technician	2	High School	Performs installation, testing, and operations of computer communications and LAN hardware.
1049	Program Executive	5	Masters	Responsible for multiple programs. Oversees individual program managers to ensure compliance with established corporate policy and performance standards; monitors and adjusts resource allocation and expenditure; serves as liaison between top internal and client management; markets information IT services.

Item #	Labor Category Title	Minimum Years of Experience	Minimum Educational/ Degree Requirements	Functional Responsibilities
1050	Program Manager	10	Bachelors	Primarily responsible for program management in accordance with client requirements and company guidelines; Specific responsibilities may include oversight of program level cost, schedule, performance, and deliverable services and products; Detects and creatively solves a wide variety of business problems; Provides the strategic planning for successful completion of the program; Directs, organizes, and monitors work activity and is responsible for meeting program cost, schedule, and performance objectives; Creates process change in response to program challenges
1051	Project Manager	0	Bachelors	Performs day-to-day management of contract support operations, possibly involving multiple tasks and groups of personnel at multiple locations, on a single project. Demonstrates skills in the scope of work encompassed by the task order. Provides technical guidance to the project team in performance of the work, and reviews the quality of all work products. Organizes, directs, and coordinates the planning and production of all contract support activities. Responsible for staffing, project planning, project financials, and staff direction and oversight. The Project Manager maintains and manages the client interface at the COTR levels of the client, including prime and subcontractor, organization. Assists the Program Manager as required in managing contract performance.
1052	Senior Documentation Specialist	8	High School	Collects and organizes information required for preparation of user's manuals, training materials, installation guides, and reports at a complex level; researches and learns the assigned system; interviews key personnel; writes materials; performs detailed edits of contract deliverables, proposals, brochures, press releases, and other materials to ensure technical accuracy, consistency, and adherence to specified content and format; participates in the writing, design, and development of marketing brochures, advertisements, news releases, feature articles, conference programs and proceedings, public relations announcements, newsletters, and other materials; designs, develops, produces, maintains,

Item #	Labor Category Title	Minimum Years of Experience	Minimum Educational/ Degree Requirements	Functional Responsibilities
				and manages client web sites as assigned; rewrites technical materials and coordinates with technical personnel to ensure accuracy; compiles and collects information for the preparation of technical proposals.
1053	Senior Help Desk Analyst/Manager	7	Bachelors	Responsible for project oversight and direction. Ensures conformance with work standards; interprets policies, procedures, goals and objectives of the organization. Ensures appropriate resources are applied to the project. Nature of work involves complex information technology project management, strategic and tactical planning, coordination, control, and critical decision-making. Requires experience related to work being performed. May also involve complex technical engineering design and technology architectural tasks.
1054	Storage Engineer, Level 2	5	Bachelors	Minimum General Experience: 5 years of general Information Technology (IT) experience with data protection technologies and storage architecture, design and implementation are required. 2 years of specialized experience with break-fix work; EMC, NetApp or similar Enterprise level on-premise and/or cloud storage technology; IT architecture and data center environments; complimentary skillsets (e.g., backup, virtualization, networking); and/or Fibre Channel protocol and topologies is required. Experience and/or familiarity with private and cloud storage technology and the ability to make recommendations for storing data in a cloud environment when appropriate are required. An understanding of data protection media familiarity with SAN and NAS concepts and technologies; Linux, Windows, and MAC server administration; and VMware based virtualization is preferred. Functional Responsibility: May work with minimal supervision/guidance. Sizes storage systems and capacity upgrades to meet requirements. Performs various professional services with customers to include designing and architecting on-premise and

Item #	Labor Category Title	Minimum Years of Experience	Minimum Educational/ Degree Requirements	Functional Responsibilities
				<p>cloud storage solutions that will meet the customer's desired performance and functionality requirements. May be responsible for working with the customer to analyze storage performance requirements for applications that will be running on the storage systems. May be responsible for making vendor neutral recommendations to the customer that will meet the requirements. Engineer also responsible for implementing the new storage system into the desired environment. Assumes the role as the point person to answer a wide variety of technical questions regarding storage systems. Troubleshoots technical errors, resolves issues, and mitigates risk. Participates in creation of lab testing procedures. Minimum Education/Training: A Bachelor's Degree in Computer Science, Information Systems, Engineering, Mathematics, Business, or another related discipline is required. Additional experience is accepted in lieu of a Degree. A Master's Degree accounts for 2 additional years of experience. Specialized technical training and/or an enterprise level vendor storage certification (e.g., EMC Storage Administrator Certification (EMCSA)) is preferred.</p>
1055	Subject Matter Expert, Level 3	8	Bachelors	<p>Minimum General Experience: 8 years of general experience as a domain expert with authority and expert knowledge in subject matter related to the functionality of a particular information technology system, application, or process is required. 2 years of specialized experience providing support to system and application development and enhancement initiatives which may include, but are not limited to conducting requirements analyses, research, and performance evaluations; making recommendations for enhancing productivity and efficiency, reducing operating costs; supporting the development and delivery of presentations, executive briefings, product demonstrations, etc.; supporting technology, product, system, application, etc. testing; and collaborating with project teams, other vendors, stakeholders, and senior level management. Functional Responsibility: May provide subject matter guidance, information, and recommendations to project teams and client staff, as required.</p>

Item #	Labor Category Title	Minimum Years of Experience	Minimum Educational/ Degree Requirements	Functional Responsibilities
				<p>Performs as a domain expert with special knowledge or skills in a particular area of endeavor. Plans, conducts, directs, and researches development and/or implementation work on specialized tasks necessitating the organization and application of innovative approaches. Evaluates existing information technology (IT) hardware and infrastructure, including desktop and server hardware and network architecture, and makes recommendations for enhancements, modification and solution to potential issues. Supports the development of demonstrations and presentations for client staff, stakeholders, and management. Provides general subject matter consulting services. Interacts with customers regarding strategies, requirements, problem solving, and support.</p> <p>Minimum Education/Training: A Bachelor’s Degree in Computer Science, Information Systems, Engineering, Business or a discipline related to the subject matter is required. Additional experience is accepted in lieu of a Bachelor’s Degree. A Master’s Degree accounts for 2 additional years of experience. Specialized training and/or certifications related to the subject matter is required. For example, a Virtual Desktop Infrastructure SME prefer to have a VMware Certified Professional 7 – Desktop and Mobility (VCP7-DTM).</p>
1056	Subject Matter Expert, Level 4	12	Masters	<p>Minimum General Experience: 12 years of general experience as a domain expert with authority and expert knowledge in subject matter related to the functionality of a particular information technology system, application, or process is required. 5 years of specialized experience providing support to system and application development and enhancement initiatives which may include, but are not limited to conducting requirements analyses, research, and performance evaluations; making recommendations for enhancing productivity and efficiency, reducing operating costs; supporting the development and delivery of presentations, executive briefings, product demonstrations, etc.; supporting technology, product, system, application, etc. testing; and collaborating with project teams, other vendors,</p>

1064	Web Designer/Developer III	4	Bachelors	Performs website design and creation. Plans, designs, develops, tests, edits, maintains, and documents look and flow of websites. Interviews clients to help them clarify their goals for establishing a website. Designs or supervises design of digitized images, banners, bullets, charts, image maps and other graphics to enhance appearance of site. Requires knowledge of programming techniques and computer internet systems. Performs a variety of tasks. Works under general supervision; Reports to a project leader or manager. A certain degree of creativity and latitude is required. Familiar with standard concepts, practices, and procedures within a particular field. May lead or direct others
1065	Web Designer/Developer IV	6	Bachelors	Performs website design and creation. Plans, designs, develops, tests, edits, maintains, and documents look and flow of websites. Interviews clients to help them clarify their goals for establishing a website. Designs or supervises design of digitized images, banners, bullets, charts, image maps and other graphics to enhance appearance of site. Requires knowledge of programming techniques and computer internet systems. Performs a variety of tasks. Works under general supervision; Reports to a project leader or manager. A certain degree of creativity and latitude is required. Familiar with standard concepts, practices, and procedures within a particular field. May lead or direct others.
1066	Web Designer/Developer V	8	Bachelors	Controls all technical aspects of website, including performance issues, such as speed of access, and approving site content. May also have responsibilities for site design and creation. Plans, develops, tests, edits, maintains, documents and controls content, look, and flow of websites. Applies knowledge of programming techniques and computer internet systems. Familiar with a variety of the field's concepts, practices, and procedures. Relies on experience and judgment to plan and accomplish goals. Performs a variety of complicated tasks. A wide degree of creativity and latitude is expected. Very likely directs and leads others. Works under general supervision. Reports to a manager or head of a unit/department.

2. Maximum order: \$500,000 applies to all SINs.

NOTE TO ORDERING ACTIVITIES: *If the best value selection places your order over the Maximum Order identified in this catalog/pricelist, you have an opportunity to obtain a better schedule contract price. Before placing your order, contact the aforementioned contractor for a better price. The contractor may (1) offer a new price for this requirement (2) offer the lowest price available under this contract or (3) decline the order. A delivery order that exceeds the maximum order may be placed under the schedule contract in accordance with FAR 8.404.

3. Minimum order: \$100.00

4. Geographic coverage (delivery area): Domestic, to include all 50 states, the District of Columbia, all US Territories.

5. Point(s) of production (city, county, and State or foreign country): Springfield, Virginia

6. Discount from list prices or statement of net price: Prices presented are net prices/all discounts have been applied.

7. Quantity discounts: .5% for Orders exceeding \$350,000. Additional quantity discounts for products. See pricelist.

8. Prompt payment terms. Note: N/A

9a. Government purchase cards are accepted at or below the micro-purchase threshold.

9b. Government purchase cards are accepted above the micro-purchase threshold.

10. Foreign items (list items by country of origin): N/A

11a. Time of delivery: As specified in resulting Task Order(s).

11b. Expedited Delivery: Items available for expedited delivery are noted in this price list.

11c. Overnight and 2-day delivery: Delivery will be specified in the resulting Task Order(s). Schedule customers may contact SDS Solutions for rates for overnight expedited delivery.

11d. Urgent Requirements: Agencies may contact SDS Solutions' representative to affect a faster delivery.

12. F.O.B. point(s): Destination

13a. Ordering address(es):

SDS Solutions Inc.
ATTN: GSA Orders
7940 Lobelia Lane

Springfield, VA 22152

13b. Ordering procedures: For supplies and services, the ordering procedures, information on Blanket Purchase Agreements (BPA's) are found in Federal Acquisition Regulation (FAR) 8.405-3.

14. Payment address(es):

SDS Solutions Inc.
ATTN: GSA Receivables
7940 Lobelia Lane
Springfield, VA 22152

15. Warranty provision: As specified by resulting Task Order(s). Standard One Year Manufacturer Commercial Warranty on Product SINs.

Please note, any claims against for apparent defects, errors or shortages must be made by the dealer/purchaser, in writing, within 15 working days after any delivery. Failure by the dealer/purchaser to make any claim within 15 days shall constitute acceptance of the goods and a waiver of any apparent defects, errors or shortages.

16. Export packing charges: N/A

17. Terms and conditions of Government purchase card acceptance (any thresholds above the micro-purchase level): N/A

18. Terms and conditions of rental, maintenance, and repair (if applicable): N/A

19. Terms and conditions of installation (if applicable): N/A

20. Terms and conditions of repair parts indicating date of parts price lists and any discounts from list prices (if applicable): N/A

20a. Terms and conditions for any other services (if applicable): N/A

21. List of service and distribution points (if applicable): N/A

22. List of participating dealers (if applicable): N/A

23. Preventive maintenance: N/A

24a. Special attributes such as environmental attributes (e.g., recycled content, energy efficiency, and/or reduced pollutants): N/A

24b. Section 508 compliance information is available on Electronic and Information Technology (EIT) supplies and services. Full details can be found at. The EIT standards can be found at: www.Section508.gov/.

25. Data Universal Number System (DUNS) number: 079459700

26. Notification regarding registration in System for Award Management (SAM) database.
SDS Solutions' SAM registration is current and accurate.

Appendix A – Product Descriptions/Specifications (Brochures) are provided on the subsequent pages.

HAND SANITIZING STATIONS

A man in a blue jacket is shown in profile, using a hand sanitizing station. He is standing in front of a glass door with a silver handle. The station is mounted on the door. The background shows an office hallway with white walls and doors.

Protect your customers and employees. Quick to deploy **KleenStations** ensure everyone has easy access to sanitization.

The Hand Sanitizing Station is a versatile sanitizing solution, designed for **high traffic** commercial, industrial and public spaces.

It has the unique ability to handle a very high volume of traffic with **up to 5,000 uses** between refills.

HAND **SANITIZING** STATIONS

Customizable signboard can promote your brand †

Drip tray with removable bin protects floor surfaces

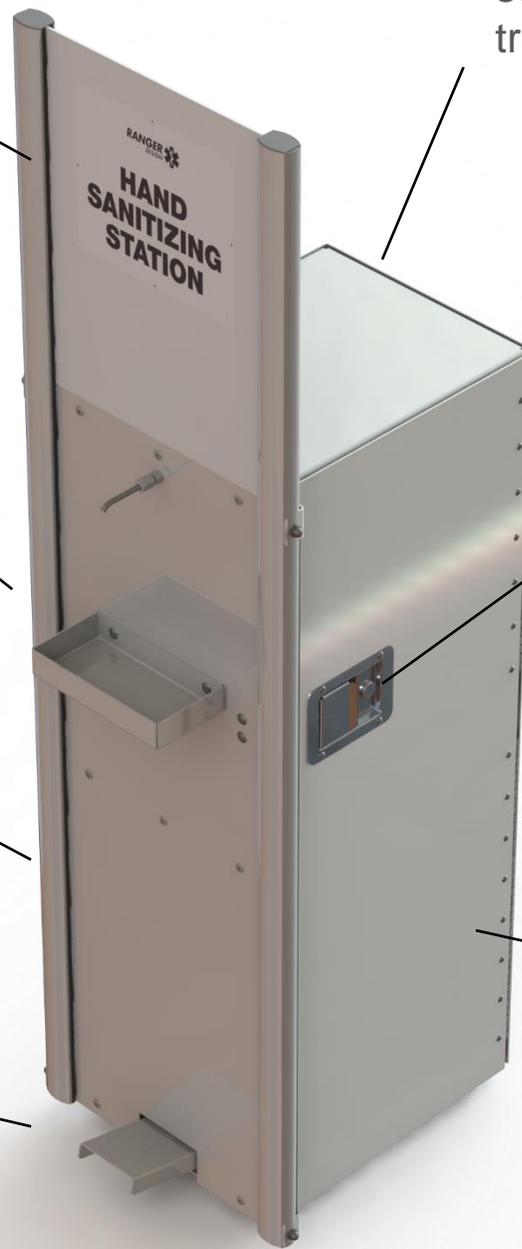

Additional space at bottom of cabinet for a refill bottle or pail

Foot pedal prevents hand contact

Rugged construction suitable for harsh high traffic environments

Keyed lock restricts access

Accepts various sizes of refill including most standard half gallon (2L), 1 gallon (4L) bottles and 5 gallon (23L) pails

† Customization available for orders of 50 or more units, extra lead time may apply

HAND **SANITIZING** STATIONS

Models Available:

KE-100 KleenStation Traffic

The best choice for ultra high traffic areas.
22 1/4" deep x **16 1/2"** wide x **61"** high
Holds up to a 5 Gallon Pail (not included)
Signage Included

KE-101 KleenStation Multi

Perfect for offices and showrooms.
16" deep x **16"** wide x **50"** high
Holds a 1 Gallon Dispenser (not included)
Signage Included

KH-120 - KleenStation KO

Store your hygiene products in a readily accessible area. Holds two boxes and a dispenser.
4 1/2" deep x **15 1/4"** wide x **10"** high

HAND SANITIZING STATIONS
